# CRYSTAL FIXTURES

**W**E are proud to present our new lines of all American made crystal chandeliers, trimmed with genuine Czecho crystals. These are beautifully designed and manufactured in our own plant under expert supervision.

**W**E have reached a high standard of perfection in hand cutting and polishing of American made crystal glass, manufacturing them under better conditions with results at least comparable, or better than the former imported product.

**I**N this catalog, you will find, in addition to the most popular traditional designs, many new and original styles, made from our own moulds and glass cutting parts, that have found favor with leading decorators throughout the country.

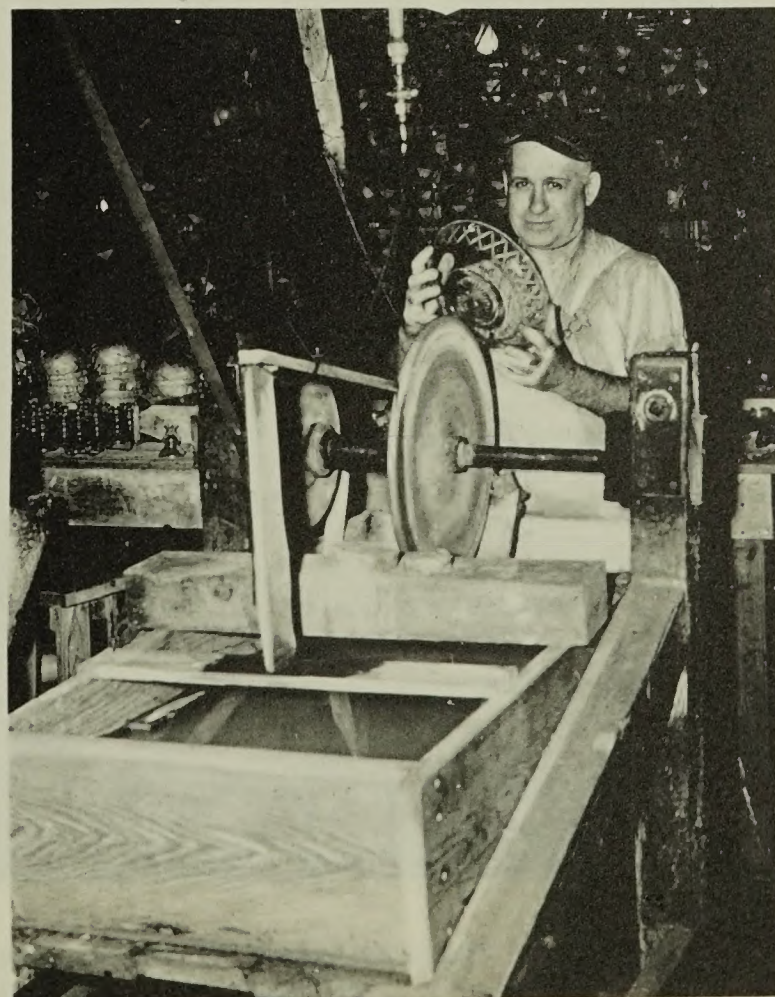

A section of the glass cutting plant of the I. ALBERT CO. The operators shown are the foremost craftsmen of hand cutting in America.

**ROUGHING**—The first operation, in glass cutting, where the design is laid out and ground into the glass, to guide the smoother.

**SMOOTHING**—The main operation, where the actual cutting is done by eye. Long experience and practice is essential in this operation.
